Current Operation

Your solutions provider with recycling operations in Cleveland, Akron, Columbus, and Poland.

**material recovery
facility**

Benefits Local Community

The **WM For Tomorrow - Material Recovery Facility (MRF)** will make Oakwood a recycling hub and the epicenter of sustainability cultivation in Ohio. It will be operated by North America's largest environmental services company, with a commitment to the environment, Oakwood Village community, and doing the right thing(s), the right way.

An investment of \$26M+ includes:

- An expansion of the recycling center's commodity bale storage from 7,000 square feet to 32,000 square feet.
- Updated uniform appearance of the exterior of the existing building.
- Landscaping of the northern property line.
- Education room at the operation for the community to utilize.
- State-of-the-art processing equipment that will improve the recovery of your recyclables.

This MRF, featuring upgraded processing equipment will provide:

- An additional estimated 40 new career opportunities, expanding upon the existing 5.
- A greater opportunity for local solutions for single-stream commercial and residential recycling.
- Cardboard, paper, plastics, and glass will be recovered and sent to end users to cultivate a circular economy in the state of Ohio.
