

CORONAVIRUS

**RESTORE.
REBUILD.
RECOVER.**

Globally, the coronavirus (COVID-19) has been categorized as a significant risk that continues to disrupt normal business operations and devastate a variety of industries.

WHAT YOU CAN DO

To help contain the spread of COVID-19 at your building or facility:

-  Wash your hands often with soap & water.
-  Don't touch your face or rub your eyes.
-  Disinfect frequently touched surfaces.
-  Avoid close contact with people who are sick.

HOW WE CAN HELP

Our teams standby to provide cleaning and decontamination services, while maintaining our quality standards and safety protocols.

- 1 PRECAUTIONARY SERVICES** There is no current concern that anyone infected with COVID-19 has come into contact with anyone in the facility. Cleaning is being performed for preventative measure only.
- 2 REACTIVE SERVICES** Belief or knowledge that someone infected with COVID-19 has come into contact with someone in the facility, or has entered the facility themselves. In this case, a more robust protocol is recommended.

WHY US

Before we formally commit to any specific job, we will analyze the situation with you, and together we will decide the best approach. As we navigate this time of uncertainty, our teams have put measures in place to monitor conditions, and ensure the safety of our people, while providing services for the business continuity of our clients.
