

KEEPING EDUCATORS AND STUDENTS SAFE IS PARAMOUNT TO GETTING BACK TO WORK AND LIFE. WE UNDERSTAND... WE ARE PARENTS TOO.

More effective. More reliable. More affordable. Maintenance free.

A recent study conducted by the National Emerging Infectious Diseases Laboratories (NEIDL) at Boston University proved the effectiveness of UV-C technology to inactivate SARS-CoV-2. Apache SafeSpace Solutions' Tomahawk 8000 is a portable, light-weight device that utilizes UV-C technology to decontaminate and destroy microorganisms in the air and on hard surfaces with 99.9% effectiveness. Located in Canton, the Apache SafeSpace Solutions team delivers all units and provides hands-on training to ensure effective use of the equipment.

\$4,150 per unit

Tomahawk 8000 Key Benefits

- Specifically designed and field tested in collaboration with a California school district to meet the specific needs of educational use.
- Pricing includes **in-person training at school at the time of delivery** and personalized follow-up support as needed.
- **Service and distribution activities managed in Ohio** out of Apache SafeSpace Solutions' regional operations center in Canton (1501 Raff Rd SW #1, Canton, OH 44710)
- Light-weight and highly mobile nature enables **decontamination of air and surfaces** above and below standard student desk height.
- Cleans a standard **20 x 20 sq ft classroom in 8 minutes** with a single unit.
- Cleans a large, multi-purpose **100 x 100 sq ft room (i.e. gymnasium) in 15 minutes** with 4 units.
- UV-C bulbs in each unit have an **8,000-hour lifetime**.
- Each unit comes with two key fobs for **remote activation**.
- **Superior technology at a more affordable price.**
