

FOCUS ON STUDENT HEALTH IS MORE IMPORTANT THAN EVER

We are ready to bring you the clean air you need

As school leaders continue to navigate the challenges of the COVID-19 pandemic, it has become nearly impossible to closely monitor the legislation that governs valuable ESSER/EANS funding options for both public and private schools.

The team at GARDINER, Ohio's leader in K-12 HVAC and clean air quality projects can provide significant education, resources, and discounted services through the HVAC, LED Lighting and Building Solutions program with the Ohio Schools Council.

"Our relationship with GARDINER is a true partnership. Like most districts, we have budget issues that make it hard to pinpoint and address all of our facility needs. Every time I speak with the team at GARDINER, it's all about how they can help us. I've had teachers and staff members go out of their way to stop me to say how much better things have been with our HVAC system since we started working with GARDINER."

Bill Fishleigh – Director of Operations, Avon Local School District

"Magnificat High School has been and continues to work with GARDINER. We have worked with them on building comfort, along with improving air quality and ventilation. The measures that have been taken this year have helped us to keep our school open."

Keith Wagner – Director of Facilities, Magnificat High School

-  Fortify student safety initiatives by improving IAQ
-  Replace & upgrade building ventilation systems to decrease the likelihood of airborne virus spread
-  Understand & utilize ESSER & EANS funding to finance your facilities projects.
-  Implement research-based strategies to provide the safest possible environment for students & teachers
-  Assess how well your facilities stack up to the WELL Health-Safety Rating, the world's leading authority on healthy building design & operation
