

Good morning,

TinyEYE Therapy Services has recently been added as an approved vendor through AEPA to the Ohio Council of Educational Purchasing Consortium (OCEPC). We are a Teletherapy company providing Speech, Occupational Therapy, and Mental Health Services to children for the last 16 years. Due to our shared mission of helping children thrive through tech and innovation, we look forward to this great partnership and growing meaningful relationships with you and your districts.

Students rely on our crucial services to develop the skills necessary to communicate, understand, and express themselves. These fundamental skills are the basic foundations of learning, which in turn supports all school subjects and life skills. We pride ourselves on creating rewarding therapy experiences for children, therapists, and schools.

We help children discover their true potential through our commitment to progressive technology and innovation, extraordinary professionalism, and long-term customer partnerships and consistent support for schools. We have an exceptional work force of people that serve for today and build for tomorrow.

**Some key challenges we often help to solve are:**

- Dealing with high caseloads & not enough support
  - Unexpected leaves
  - Compliance challenges
  - High employee turnover
- Difficulty hiring the right person for each unique need

We would love to connect and learn more about your district and how we can help your students thrive. Please reach out directly to your local TinyEYE trusted advisor:
