

****Updated 3/2/22 with new UV-C Light Disinfectant Devices****

OSC COVID-19 Supplies & Resources

The OSC has been working with our vendors and partners in an effort to provide members assistance in building sanitation and cleaning services as it relates to the COVID-19 pandemic. The OSC is proud to announce that we have many products and services available to our members. These products meet CDC standards for COVID-19. If your district is interested in purchasing, please refer to the product ordering info below. **Pricing and product availability may change based on demand.** **Please refer to ordering links below for updated info.**

MAK-Inline™

Description: Designed to easily integrate with any school's existing Heating & Air Conditioning system. Engineered for use in virtually any environment. Actively distributes Hydrogen Peroxide Plasma into the air and onto surfaces to reduce bacteria, viruses, molds, mildew, fungi, VOC's (which cause odors) and other contaminants. Silent operation — simple to install, and it starts working immediately. Available in a variety of sizes to fit any need.

[Download Specs](#)

Price: \$1,000 - \$2,400 plus additional options

MAK-5™ / MAK-9™ (meet requirements for installation on a school buses)

Description: Similar to the MAK-Inline, these units are designed as wall units in classrooms or for use on busses (meeting Highway Patrol guidelines) to dramatically reduce mold, mildew, fungus, VOC's and a host of bacteria, viruses and other contaminants. Units can be plugged into a started outlet, hard wired, or wired into a fuse box on buses to start working immediately.

Price: \$1,700 plus additional options

MAK-TWIN™

Description: Designed and engineered for a variety of applications including spaces, athletic facilities, and more. MAK-TWIN™ units provide a safe and effective three-stage solution for the reduction of bacteria, viruses (including Covid-19 and H1N1), molds, fungi, mildew and VOCs (which cause odors). Each MAK-TWIN™ features a pre-filter, a main filter, and two MAK cells which flood the area with effective and powerful Hydrogen Peroxide Plasma to reduce the populations of harmful microbial contaminants in the air and on surfaces where they live by up to 99.9%.
