

Smart Kitchen Station

Cold Storage Monitoring

Smart Kitchen Station provides cold storage monitoring through wireless temperature sensors and an online portal for real-time equipment monitoring. Ensure food safety, compliance, and alerts, with our team notified of any at-risk equipment alongside you.

Real Time Alerts

Temperature sensors monitor coolers and freezers for food safety and compliance. Receive real-time alerts with our team also notified to assist as needed.

Online Analysis & Reporting

Users can access their cooler and freezer data through an online portal, making it convenient to track from anywhere.

24-hour Battery Backup

Included is a battery backup to ensure continued monitoring in the event of an outage, ensuring uninterrupted data collection and time to respond.

Rugged Wall-Mounted Enclosure

Securely mounted in a durable enclosure, with a power cord that plugs into a standard outlet, keeping it out of the way to save kitchen space.

EdgeBUS™ AI Ready

Smart Kitchen Station is designed to learn from your equipment with upcoming EdgeBUS™ AI. It will get smarter over time by analyzing equipment data trends. It will then send real time alerts, allowing time to take necessary action to help prevent loss of food inventory.
